Aidar Gumerbaev

Senior Software Engineer

📍 Berlin, Germany (remote available)

Senior Backend Engineer with 15+ years of experience building scalable systems in the JVM ecosystem, with a strong focus on system design, performance, and maintainability.

6+ years of domain expertise in insurance, particularly within the Guidewire InsuranceSuite ecosystem.

Experience

Senior Software Engineer — FRI:DAY

2020 – 2026, Berlin

Digital insurance platform offering kilometre-based billing, monthly cancellation, and fully paperless operations.

- Specialized in Guidewire InsuranceSuite, primarily PolicyCenter within the motor insurance domain
- Implemented integrations with German insurance systems and regulatory interfaces (eVB, VWB)
- Integrated external brokers and aggregators (e.g., Check24), enabling high-volume policy acquisition channels
- Re-architected pricing calculations into stateless services, enabling horizontal scalability and isolating load from the core system
- Ensured platform stability under peak load to handle year-end business traffic
- Contributed to migration from on-premise Guidewire v9 → v10 → Guidewire Cloud
- Designed and developed backend services in Java and Kotlin running on Kubernetes
- Improved database performance and reliability (MS SQL, PostgreSQL)
- Built and maintained CI/CD pipelines (GitLab CI)

Tech: Kotlin, Java, Spring, Mironaut, Gosu, Guidewire InsuranceSuite, MS SQL, PostgreSQL, Kubernetes, AWS, GitLab CI

Guidewire Developer — Tinkoff

2019 – 2020

- Developed and customized Guidewire InsuranceSuite (primarily ClaimCenter)
- Integrated external services via SOAP and REST APIs

Tech: Gosu, Oracle SQL, Guidewire InsuranceSuite, SOAP, REST, Jenkins

Java Developer — Avtodoria

2018 – 2019

- Built microservices for a distributed traffic monitoring system (average speed enforcement)
- Developed backend services and contributed to frontend components
- Worked with high-load distributed systems and real-time data processing pipelines

Tech: Java, Spring, Docker, Kafka, Angular, Linux

Java Developer — Amfitel PLUS

2011 – 2018

- Developed enterprise system for equipment inventory and business process automation
- Designed backend architecture and database schemas
- Contributed to early blockchain-based solutions (Ethereum smart contracts)

Tech: Java, Spring, GWT, Oracle SQL, PostgreSQL, Maven

Web Developer (part-time) — Volga Travel

2009 – 2013

- Built and maintained an online booking system
- Managed infrastructure and internal tools

Tech: PHP, MySQL, JavaScript, HTML, CSS
Other: System administration

Education

Master's Degree in Software Engineering

2006 — 2011

Kazan State Technical University

Skills

Programming languages:
Java, Kotlin

Backend & architecture:
Microservices, REST APIs, High-load systems, System design

Frameworks:
Spring, Micronaut, Guidewire InsuranceSuite

Databases:
MS SQL, Oracle, PostgreSQL

DevOps & infrastructure:
Docker, Kubernetes, AWS, CI/CD, Linux

Build tools:
Maven, Gradle

Frontend:
JavaScript, HTML, CSS

Version control:
Git, SVN

Languages

- Russian — Native
- Tatar — Native
- English — Professional
- German — Intermediate (*B2 in progress*)
- Turkish — Basic
